EPFL

Master of Science in

COMPUTATIONAL SCIENCE AND ENGINEERING

2-year program - 120 ECTS

| | Credits |
|--|---------|
| Core courses | 24 |
| Advanced numerical analysis | 5 |
| - Algorithms | 8 |
| Computer simulation of physical systems I | 4 |
| Image processing I | 3 |
| Introduction to multiprocessor architecture | 4 |
| - Machine learning | 8 |
| Molecular dynamics and Monte-Carlo simulation | 2 |
| Numerical analysis and computational mathematics | 4 |
| Parallel and high-performance computing | 4 |
| Programming concepts in scientific computing | 4 |
| ─ Software engineering | 4 |

| | Modeling and numerical methods | 36 |
|---|--|--------|
| | Computational modeling based on differential equations | 8 min. |
| | Atomistic and quantum simulations of materials | 4 |
| | Computational neurosciences: neuronal dynamics | 5 |
| | Dynamical system theory for engineers | 6 |
| | Environmental transport phenomena | 5 |
| | Hydrodynamics | 5 |
| | Instability | 3 |
| - | Numerical flow simulation | 5 |
| | Principles and applications of systems biology | 3 |
| _ | Turbulence | 5 |

In the Modeling and numerical methods group, students have to choose 3 out of the 4 lists and complete at least 8 ECTS in each of them.

Internship

The program includes a compulsory 8-week internship which can be extended to 6 months.

| Computational modeling based on discrete systems | 8 min. |
|--|--------|
| Computational methods in molecular quantum mechanics | 4 |
| Distributed intelligent systems | 5 |
| Geometric computing | 6 |
| Image processing II | 3 |
| Introduction to electronic structure methods | 4 |
| Mathematical foundations of signal processing | 6 |
| Mathematical modeling of behavior | 5 |
| Molecular quantum dynamics | 3 |
| Structural biology | 4 |
| Understanding advanced molecular simulation | 4 |

Numerical methods, algorithms, high performance syste

Numerical integration of stochastic differential equations

Numerics for fluids, structures and electromagnetics

Advanced multiprocessor architecture Computational linear algebra

Low-rank approximation techniques Numerical approximation of PDEs

Numerical methods for conservation laws

Inference on graphs

Stochastic simulation

Career prospects

EPFL is a world leader in computing, engineering and fundamental sciences. A Master in Computational Science and Engineering from EPFL opens the door to top employment with computational skills in a broad spectrum of industries, not only in all branches of engineering, but also in emerging and vibrant market sectors including energy, financial and pharmaceutical R&D.

It is also a strong asset for a PhD in Computational Science.

| a science | 8 min. |
|---|---|
| rithms II | 8 |
| lied data analysis | 8 |
| ficial neural networks/reinforcement learning | 6 |
| p learning | 4 |
| p learning in biomedicine | 6 |
| ndations of data science | 8 |
| rmation security and privacy | 8 |
| hematics of data: from theory to computation | 6 |
| mization for machine learning | 8 |
| istics for data science | 8 |
| ems for data management data science | 8 |
